HORMUSJ SORABJEE.

26, Meadow Street, Fort.

POONA SEASON 1877.

IMPORTANT ANNOUNCEMENT.

TREACHER & Co., Limited, have much pleasure in drawing attention to the large and varied stock now on view at their Poona Establishment.

THE PHARMACEUTICAL AND SCIENTIFIC DEPARTMENT

Of the business has recently been largely extended to meet the rapidly increasing demands upon it, and is under the constant supervision of a thoroughly competent Pharmaceutist of many years experience in the first class London and Provincial Houses, whose chief attention is devoted to testing analytically the Purity and Quality of the Drugs and Chemicals employed in Dispensing Physicians' Prescriptions and in preparing and despatching Medicines.

The Surgical and Scientific instruments are procured from Arnold, Coxeter, Cassella, and other leading London makers, for whom the Company are the appointed Agents in this Presidency.

THE WINE AND SPIRIT DEPARTMENT

Offers a selection unequalled by any House in this Presidency.

SHERRIES and PORTS selected by the Company's Continental Agents ; BRANDIES from the Ce.'s Cognac Agency ; the Company's special imports of CLARETS, HOCKS, MOSELLES, &c. ; CHAMPAGNES from Giesler, Perrier, Jouet and the Company's Reims Agency, coupled with the Company's general supplies of LIQUEURS, ALES, and STOUT of every description, are so widely and well-known as to render commendation unnecessary.

THE PROVISION AND STORE DEPARTMENT

Is replete with fresh supplies from the first English and Continental Houses of every description of Preserved Meats, Game, Poultry, Fish, Pickles, Soups, Vegetables, Pates, Fruits, Jams, Jellies, Bon Bons, Chocolates and other Table and Household Requisites, all imported by the Suez Canal.

The special attention of Messes and Clubs is directed to the fact that the rates in this department are lower than articles of the same high class description can be imported direct from England independent of the convenience of ensuring fresh articles from time to time in such quantities as may be required, the extensive purchasing powers of the Company being the explanation, "*Each article is guaranteed.*"

THE JEWELLERY, SILVER AND ELECTRO-PLATED DEPARTMENT

Offers a selection which for variety, taste, and workmanship has never before been attempted in Western India.

The stock is entirely new and has been selected specially for the Poona Season. Accessions to the stock are received by each Overland Mail, and this, combined with the large sale, enables the Company to offer the prettiest and most novel designs at all periods of the year, an advantage which is obvious.

THE FANCY DEPARTMENT

Including Dressing Bags and Cases, Writing, Despatch and Tourists' Cases, Travelling and Carriage Bags, Japanese Curiosities, Albums, Parian Statuary, Glass and Porcelain Vases, Fans, and the numerous other elegancies for which the Company is so well known, offers an extent of selection which will vie with many of the collections to be met with in the principal European cities.

THE GENTLEMEN'S HAT, HOSIERY AND GLOVE DEPARTMENT

Meets with special attention from the Manager of the Establishment, whose lengthened experience of this branch will be a sufficient guarantee to Constituents that their commands will be met by supplies of Goods "new, well assorted, and adapted for a first class trade."

THE DEPARTMENT FOR LAMPS, GLASS AND CROCKERY-WARE,

BATHS AND GENERAL HOUSEHOLD REQUISITES

Has been considerably extended, and now commands a selection never before presented in Poona. The brilliance and exquisite finish of the Glass and Crockery-ware is unsurpassable, and the artistic workmanship displayed in the manufacture of the Kerosine Lamps, such as to command approval.

THE STATIONERY DEPARTMENT

Comprises Writing Appliances of every description and a large variety of elegancies for the Drawing-room Table or personal use, also the largest stock of Artists' Materials in Western India ; the former are of Messrs. De La Rue and Company's manufacture, and the latter are imported in weekly consignments from Messrs. Winsor and Newton, for whom the Company are the sole appointed Agents in this Presidency. A large selection of the cheap editions of the works of the most illustrious authors of the present and preceding generation is always on hand in this Department.

The attention of the Secretaries of Regimental and Station Clubs, Schools, &c., is solicited to

THE DEPARTMENT FOR GYMKHANA AND SPORTING KIT,

Which comprehends Golf, Cricket, Racket, Felting, Croquet, Fishing and Billiard requisites of every description and a large assortment of Sporting Ammunition.

The Company solicit special attention to this Department, as the various articles are manufactured to meet the requirements of the Indian climate by Messrs. Jas. L

COMMERCIAL INTELLIGENCE

FRIDAY EVENING, 10TH AUGUST 1877.

We have a very quiet and uneventful day's business to report upon. Reuter's telegrams of yesterday show but little change in the position of Indian Produce in the Home Markets. Consols and French Rentes continue to be quoted at 95⅛ and 106¼ respectively.

The Bank of England Return for the week ending on Wednesday shows a decrease in the Reserve of Notes of £70,000; in Bills discounted of £400,000, and in Bullion also of £600,000. The proportion of the Reserve to the Liabilities has declined to 44⅛. The rate of discount for 3 months' sight Bank Bills is given at 1⅛ per cent.

Cotton in Liverpool is stated to be dull. Reuter's closing telegram of yesterday reports sales of 7,000 bales, of which 800 were Surats. Prices in Liverpool are generally unchanged. We notice a decline of 1-16d. per lb. for fair Oomrawuttee and Compta, and ⅛d. per lb. for fair Hingunghat. Reuter's New York telegram quotes Middling Uplands, ready, at 11¼ cents per lb., and November shipment at 10⅞ cents per lb.

The Manchester Piece Goods Market is also described by Reuter as being dull.

Coffee in London is reported unchanged, while Cocoanut Oil shows a decline of 5s. per ton for Ceylon and a like advance for Cochin.

Bombay Linseed and Rape are reported firm at Home at unchanged prices, while an advance of 6d. per cwt. is quoted for Calcutta Linseed. Reuter reports no alteration in the prices of Wheat.

Enfaced Rupee Paper is still quoted at 83⅛ for 4 and 4⅛, and 88⅛ for 5½ per cents. Exchange on India for 60 days' sight Bank Bills is given as unchanged at 1s. 8⅛d. per Rupee.

Bar Silver is quoted at 54¼d. per ounce. The shipments for India are again considerable, being reported at £210,000 for Bombay and £260,000 for Calcutta.

Sterling Exchange here has been weak to day, and a partial decline of 1-16d. per Rupee has taken place. This is partly owing to the report of an easier feeling, with a downward tendency in Calcutta, although we must mention that the telegrams received are not unanimous on this point, and partly to the heavy exports of Silver from Home. There has been but little business doing, all exports being on a very small scale, and owing to the excessive dulness in the Import Trade, there being but little demand for Bank Bills. We quote on London :—

Bank Bills on demand	... 1s. 8⅞d.	per Rupee.	
Do. at 3 months' sight	... 1s. 9d.	,,	
Do. ,, 6 ,,	,, ... 1s. 9 1-8d.	,,	
Credits ,, 3 ,,	,, ... 1s. 9 1-8d.	,,	
Do. ,, 6 ,,	,, ... 1s. 9 5-16d.	,,	
Documents ,, 3 ,,	,, ... 1s. 9 3-16d.	,,	

On Calcutta there has been some enquiry for Bills on demand at 3 annas per cent. premium, and business has been done at that figure; for Bills at 60 days' sight the rate is still 10 annas per cent. discount.

In Government Paper there continues to be next to nothing doing. We quote 96 to 96¼ for 4, 96½ for 4½, and 102¼ for 5½ per cents.

Shares.—Bank of Bombays are firm at unchanged prices. Land shares, with the exception of Masagons, which have advanced Rs. 25 per share, are without movement. Press Companies' shares generally are dull and depressed, and a decline of Rs. 5 to Rs. 90 per share has been established in the quotations for most Companies. In Spinning and Weaving scrip there has also been a pretty general decline, ranging from Rs. 5 to Rs. 35 per share, and in some instances even more. Alberts, Great Easterns, and Colabas, on the other hand, show an advance respectively of Rs. 15, Rs. 10, and Rs. 5 per share.

Cotton continues extremely dull, and is likely to do so until some improvement takes place in the Liverpool market or prices here recede to figures showing some margin of profit, as compared with present Home rates. Purchases have been reported for the local Mills of 225 candies of Wudhwan at Rs. 190, and 100 candies Dhollera at Rs. 191 per candy.

Seeds.—The Market is very quiet, Linseed is quoted ½ anna per cwt. lower, while Rapeseed remains unchanged. Wheat is firm; we quote Best White at Rs. 38 to Rs. 38½ per candy.

Freights.—We have nothing worthy of report to notice.

Piece Goods continue in the same dull position that we have had to comment on for some time, and we see little chance of improvement until there is some marked change for the better in the grain crops' prospects of the country. Sales by importers are on the most insignificant scale.

Coals.—We have no alteration to report.

THE EASTERN QUESTION IN PARLIAMENT.

LONDON, Aug. 10.

In both Houses of Parliament last night, the motions on the Eastern Question were withdrawn, the Government declaring that their discussion would be injurious to the public interests.

In the Lords, Earl Beaconsfield added, that the policy of the Government continues to be one of non-intervention so long as English interests in the East were not affected.

The Lords have passed the second reading of the East Indian Loan Bill.

The Marquis of Salisbury, in answer to a question put, refuted the fears entertained respecting the finances of India.

FRONTIER AFFAIRS IN PARLIAMENT

In yesterday's sitting of the House of Commons, there was a debate upon Mr. Grant Duff asking for an explanation as to the occupation of Quetta by British troops, the negotiations at the Peshawur Conference, and the changes made in the Frontier districts.

Lord George Hamilton, in reply, said that the apparent change in our policy was a change of method and not of principle, and that it was the endeavour of the Government to maintain cordial relations with the potentates on the Indian frontier. The invasion of India, he said, was improbable for many years to come, and that any such enterprise would be hopeless in the meantime.

Sir Stafford Northcote said that the policy of the Government was to husband its resources; complete its internal lines of communication, and conciliate the population by good government.

MOVEMENTS OF SULEIMAN PASHA.

Suleiman Pasha has received reinforcements, and will at once endeavour to force the mountain passes of the Balkans and co-operate with Mehemet Ali, the Commander-in-Chief of the Turkish forces, and Osman Pasha. A strong resistance on the part of the Russians and severe fighting is expected.

Mehemet Ali is near Rasgrad, where he awaits the result of Suleiman Pasha's operations before moving forward.

THE RUSSIAN HEADQUARTERS.

The Russians have transferred their headquarters to Bulgreni.

RUSSIA AND AUSTRIA.

The Russian Government has tried to obtain the sanction of the Austro-Hungarian Government for the passage of Russian troops through Servian territory. It is generally reported that the Austro-Hungarian Government has refused to comply with their request.

THE MAILS.

LONDON, Aug. 9.

The Bombay Mails of the 20th ultimo arrived at Brindisi yesterday.

LONDON, Aug. 9, Aft.

The Liverpool Cotton Market closed dull. Surats dull.

We are glad to read that the weather at the Neilgherries has taken a decided turn for the better for the last five days, about an inch-and-a-half of rain having fallen since the 2nd inst. and up to the night of the 7th. In the Wynaad the fall has been much greater, about 3 inches in the south-east in one day—on the 3rd. The prospects of the district are improving, the estimated out-turn from native cultivation being not much under that of an average year. The Bangalore paper also says, "We are experiencing real Bangalore weather, and a continuance of the same for a fortnight or so will probably tide us safely over a good bit of the crisis we are passing through. The clouds had been gathering on Sunday afternoon from an early hour, and about 6 p.m. the floodgates of heaven were thrown open, and a copious downpour fell. The rain seemed to fall most heavily in Shoolay and Richmond Town, and the sky looked very threatening in the Ooscor direction. There has been heavy rain in Nundidroog, Yebagode, Surjapore, and Kolar."

In consequence of the prevailing scarcity and the difficulty experienced in provisioning the military, the stationed at Bellary, the Madras Government have instructed the Quarter Master General of the Army to make the necessary arrangements with the railway authorities for immediately transporting the several regiments, European and native, as well as the cavalry and artillery, stationed at Bellary to Madras in view to their being encamped near Saint Thomas' Mount. One of the native infantry regiments is to go on to Cannanore.

We are glad to learn that the late Quartermaster Sergeant Miller, who was tried by courtmartial at Bombay a short time since, and whose unfortunate reduction to the ranks as a private on a charge of having written a letter to a London newspaper has been so much commented on by the public press, has been, by order of His Excellency the Commander-in-Chief, again promoted to the rank of Sergeant. We congratulate Sergeant Miller on his restoration, and we hope that a man whose past career in the service of his country has been one of honourable distinction may yet meet with a higher reward.

A CORRESPONDENT from Coorg writes:—"A rather absurd thing happened here the other day. Ten elephants came from Mysore to bring up rice from the coast for the sepoys. When they arrived in Mercara from Mangalore they had not a quarter of the rice they started with; the elephants had eaten the best part of their load on the road. I fancy they will not try the experiment a second time."

It may rejoice many good souls to learn that the Methodist revivalist, the Rev. William Taylor, is about to revisit India. The following is an extract from a letter, dated San Francisco, California, June 8, which he has written to a friend in India:—"I start East to-morrow. It seems worse than death, after so short a time with my family, to pull up stakes and leave, but my duty is plain. I will attend the camp meetings in the East, and get ready to return to India by September or October."

ANOTHER attempt was made a few days ago to throw a train off the line on the East Indian Railway near Pakour. This is the second case that has been reported within a week. The motive in this instance is attributed to a wish to punish an unpopular driver. This is not very cheering to people who have to travel much by railway, and unless the company succeed in tracing out and having an example made of the delinquents, a railway journey is likely to become "quite too exciting."

THE matrimonial mania has commenced its ravages at Simla, says the correspondent of the *Pioneer*. "There have been some serious cases beyond cure, and others are still sickening for it. It is dangerously catching, and I fear some time will elapse before it can be eradicated. In one or two solitary instances cures have been effected, but these are of rare occurrence. Before we separate and retire to the plains you will doubtless receive numerous fees for insertions of domestic occurrences under the second head. The rink has, I think, a good deal to answer for in causing the spread of this disease, though I must admit cases have occurred which cannot in any way be attributable to its influences."

THE monotony of the quiet station of Sahibganj on the loop line of the E. I. Railway has been disturbed by a serious and unprecedented occurrence. Rumour had it that two natives had been shot by a European gentleman in the station, but no one could definitely state what had really happened. The facts of the case, as briefly stated, are as follows:—A European gentleman lately out from England had fallen in love. The lovers, it would seem, were not satisfied with meetings by daylight, and nocturnal ones were arranged; and matters continued a while unsuspected by any one, till, alas! for our hero, he was stopped one night by a servant of the house where his lady love lodged. This man told his master what he had discovered, and the latter gave orders to his servants that, on his next visit to the place, the gentleman should be seized. The men had not long to wait, for the very next night at about 12-30 a. m. the gentleman was spied picking his way as quietly as possible towards the house. When the house was nearly gained, two men sprang on him, one holding him round the waist, while the other clung on to his legs. He was not going to be conquered so easily, however, as, in much less time than it takes to write it, he drew a revolver, knocked one man down with the butt-end, and, as the second, who, as stated above, had fixed on to his legs, would not relax his hold, he let him have the benefit of three bullets, one of which glanced across his side, the second lodging in the fleshy part of the man's leg, and the third entering his stomach. With these three wounds, the poor wretch now lies in a most precarious state. The police have heard all about it, and are making enquiries.

WE had flattered ourselves, says the Lahore paper, that our account of the Delhi Sarogi procession was tolerably full, from the graphic pen of our contributor. But a native gentleman who seems interested in our welfare—and in that of a friend of his—points out an important omission. Our correspondent, he says, failed to notice "a native gentleman, on a grey horse, in a military uniform, going a few paces ahead before the Commissioner and Deputy Commissioner." This illustrious personage, we are informed, was "Nawab Allaoodeen, Chief of Lobaroo, who volunteered his services in the procession, simply to protect the Commissioner and Deputy Commissioner . . . . the same Chief who offered his services to the Crown for the suppression of the Afreedees." We re-echo the peroration of our native friend's epistle, "O may India bring forth more enlightened and accomplished men!"

CAPTAIN THE HON. H. S. O'GRADY, of the Royal Artillery, who was Aide-de-Camp to the late Lord Hobart for some time, has, by the death of his brother, succeeded to the title of Viscount Guillamore.

A CORRESPONDENT of a London paper announces the death of General Nelson:—I have to record the death of this officer, of the Royal Engineers, which occurred at his residence in Devonport in the seventy-fifth year of his age. General Nelson has for many years taken a warm interest in religious and philanthropic organizations, and has contributed many valuable papers upon geological and kindred subjects to the British Association and other learned societies. He investigated at Bermuda the growth of coral reefs. General Nelson was remarkable for his stalwart frame; he stood nearer seven than six feet in height.

THE *World* says:—Everything possible is being done to hush up the unfortunate results of the march from Aldershot to Windsor and back for the review ordered last week by the Queen. From the division of little more than 14,000 troops more than 660 fell out unable to march. This is the number of authenticated cases, and does not include the men who rode on baggage wagons, bread wagons, and other transport vehicles. If I thought any good would be derived from concealing this, I would hold my tongue; but it is far better that the nation should know of what stuff its one solitary division is composed; and I hope that the reports of the medical officers upon the condition of the men on their return to Aldershot will be asked for in Parliament. If all that I hear is true, the production of these reports would burst the bubble of "successful recruiting" so often floated before our eyes.

THE *Jewish World* is informed that the Anglo-Jewish Association has received applications on behalf of hundreds of Jewish families who have fled from the localities where at present the war is raging, and that many are dying of hunger. The executive committee are engaged in concerting combined action with the institutions allied to the association, for the purpose of alleviating the distress of the sufferers.

THE *Athenæum* says:—A work on occult science in the East by Madame Blavatsky, a native of Asia, is in the press, and will be published by Mr. Bouton, at New York, and by Mr. Quaritch, in London. The performances of fakirs, magicians, and religious sheiks which impress travellers with such surprise, will be fully described, and the author promises to give some explanation of the *modus operandi*. "A native of Asia" is a singular vague expression. Madame Blavatsky might be a Papuan.

THE conduct of a gentleman who recently visited Bath will scarcely tend to raise Anglo-Indians in the estimation of the good people of that city. We take the following paragraph from "Notes on News" in the *Sportsman*:—

"An abominably wicked piece of deceit has been practised upon a number of good people at Bath, showing the necessity for caution in dealing with strangers who offer to render gratuitous assistance in carrying out works of philanthropy. Towards the middle of July individual of persuasive manners presented himself before the committee of one of the new fashionable teetotal public-houses or coffee palaces. The pleasant speaking stranger explained to the committee that having lately returned from India he was desirous of occupying his leisure in works of charity, and he would, subject to their approval, assist in the labour of receiving visitors at the clubhouse. No one whom we need not describe more particularly than to remark that he wears odd shoes. The committee were exceedingly obliged for the proffered assistance, and at once took the traveller from the East into their confidence. He accompanied them to several prayer-meetings, at which he delivered discourses that would have softened the frozen heart of a winter cabbage; and that secured for him numerous invitations to the homes and hearths of various members of the committee. Having partaken of these unsuspecting innocents' hospitality it did not appear strange that he should desire to entertain them in return. They and their friends, therefore, to the number of one hundred, graciously accepted his courteous invitation to spend a day in the country as his guests. Meanwhile he ordered by telegraph a splendid repast, and sent a number of breaks, hired on credit, to take up his guests. The breaks and party duly appeared on the scene, when it was discovered that the pseudo-pious stranger had absconded, carrying with him a rich booty of stolen money, clothes, and jewels, abstracted from the houses he had honoured with his company. It is possible, though altogether unlikely, that this wicked man may have come from India, as he pretended; that he will ultimately be related to a much warmer climate is, however, far more probable. The moral of the story, if moral it possess, suggests that philanthropists should be careful how they entertain strangers, lest they entertain a fallen angel unawares.

Truth says:—The other day I heard Lord Beaconsfield quoted as one of those who prefer sweet champagne to dry. A dictum of Mr. Canning, in favour of Clicquot *vs.* Giesler, clenched the matter. A little investigation resulted in the discovery, that the supposed opinions of these high authorities rested on a speech of Mr. Disraeli's in the House of Commons, when he related a legend of Mr. Canning's taste, which, had it occurred, I should have been incredulous. The fact is, that, for once in his life, the first Minister made a hash of his story, and not only missed the point but made a false point. Mr. Canning never alluded to any controversy between dry and sweet. What he really said was, "the man who says he prefers *still* champagne to sparkling, lies." It was on the same occasion that the creator of the new world (which, by-the bye, has certainly "redressed the balance of the old," though hardly in the way Mr. Canning anticipated) declined to try a hot Montauche ham (a great delusion, hot or cold), adding, that "any one who would eat ham hot would kill the pig."

THE following appears in the *Estafette*:—"This brewery has an immense reputation. Its fermented liquor is bought by "the barrel." A few days ago an accident which happened to one of the vats necessitated some repairs. The huge receptacle was emptied, and at the bottom, in a state of advanced decomposition, was found the body of a nigger, a late servant in the firm, who through disappointed love had been driven to throw himself into the beer as others throw themselves into the water. Maybe you believe that this discovery has excited a feeling of disgust amongst the consumers? Not at all. In the Strand are to be met drinkers who speak of the "beer *au nigre*" with the gusto which a thoroughbred native of Bordeaux talks of the "*vin de la comète*."!

ANOTHER advance in the science of electric telegraphy is recorded which, if it is possible to continue it to practical results on a large scale, will revolutionise the system of transmitting telegraphic messages now adopted. The very existence of the natural currents of electricity, which, during thunderstorms especially, are occasionally so disastrous to the system of suspended wire telegraphs, will, it is expected, be turned to account in the method of the future. More than a century and a quarter ago Franklin discovered, by means of his celebrated kite, that the electricity which manifested itself during a thunderstorm could be attracted and brought to the earth as easily as the rain drops which accompany the storm can be collected and conveyed to any particular locality. The lightning conductor is one practical result of this great discovery. Professor Loomis, of Washington, has somewhat reversed the order of things, and proposes to transmit signals by electricity from the earth to the air by means of a kite, and to bring them down again at a distance by the same agency, without any connecting link existing between the two kites. His theory is that currents of electricity, generally in the same plane, exist continuously in the air at certain distances from the earth, and that these currents might be made to take the place of the wires now used to connect different places—the invisible substitute for a material and troublesome agent. Indeed he goes further than theory, for he claims to have reduced his ideas to practice, and to have communicated with another person at a distance of twelve miles, his only apparatus being two kites, one flown by himself and the other by his assistant, and a fine copper wire being substituted for the string holding the kites. Each kite was flown to a certain altitude, and when a message was transmitted by means of an ordinary instrument by Professor Loomis, it was carried upwards through the copper wire to his kite, conveyed by the natural current of electricity to the kite twelve miles off, and thence by the latter's wire to the operator at the other end.

RAIN IN CARWAR.

ON Thursday evening, Messrs. Nicol and Co. received the following telegram from the Agent of the Carwar Company, Hoobles, "Yesterday, here steady soaking rain." Yesterday morning the same firm telegraphed enquiring if the fall had been general, to which the following reply was received, "Continual showers. Jowaree crops much improved. Showers at Gudduck, Bunkapore. Reports good."

ENGLISH MILITARY LETTER.

(FROM OUR OWN CORRESPONDENT.)

LONDON, JULY 20.

AT length there is some chance of the same advantages of civil employment being held out to the soldiers of the British army, as has long been the practice in foreign countries. One of the greatest obstacles to active recruiting has been the difficulty a soldier not unfrequently has experienced in obtaining a situation after his term of military service has expired. People are beginning gradually to realise that a man because he has been in the army is not necessarily vicious. The prejudice which still remains is but a faint relic of former tradition. Now an individual who has completed six years in a good regiment is incomparably better and more useful than he was when he went into it. His education is advanced. He has gained experience. He has possibly learnt a trade. He has acquired habits of cleanliness, neatness, order, and discipline. But it behoves the Government to set the example by recognising all the soldier has gained by securing his future labours for the Civil Service of the Crown. In Germany not to have been a soldier is to be unable to obtain any post whatever. Last year a committee was appointed by the House of Commons to consider the subject of the civil employment of soldiers, sailors, and marines. Mr. Childers was nominated chairman, and the committee comprised—General Sir George Balfour, General Shute, Colonels Sir Charles Russell, Sir Henry Havelock, Viscount Hinchingbrook, Lord Elcho, and Mure, Major O'Gorman, Sir John Hay, Sir Henry Holland, Captain Price, R. N. and Messrs. Gerard Noel, Laing, Talbot, Campbell-Bannerman, and Holms. On Monday last the Field Marshal Commanding-in-Chief gave evidence before the committee, and it was, as might be expected, of a very clear and favourable character. His Royal Highness was of opinion that it would be of great advantage to the public to hold out this reward for good and faithful service. Indeed, he could not see why the work at the War Office might not be done quite as well, if not better, if every department was filled with officers, non commissioned officers, and privates. The views of the Duke seemed so acceptable to the members of the committee that a favourable report may be confidently looked for, and in time the head clerkships may possibly be filled up from officers; ex non-commissioned officers may replace the present civilians in the inferior ones; and the messengerships may be tenanted by former soldiers, instead of by worn out domestic servitors.

The progress of the war has been more rapid than even I anticipated, and there were, I believe, few people who shared my opinion as to the impossibility for the Turks to resist the Russian advance. Ere this it is close to, or, probably, even in occupation of, Adrianople. Nearly half a century ago Diebitsch thought that nine days would suffice to bring him thence to Constantinople. His army was too feeble, too harrassed by disease to make the venture. But this is almost too late for us to move even with the faintest prospect of stopping them. A little further delay and the British Fleet will be shut out from the Dardanelles. The Russians will make a rush for Gallipoli. Unless Admiral Hornby be allowed to disembark troops, and to fortify the narrow neck of land which joins the isthmus to the continent, so soon as the first soldier is south of Adrianople, all hope is gone. Nothing is being done at home. A spirit of dejection seems to pervade all classes. The disastrous march to and from Windsor has damped the courage of even the most enthusiastic. On the return journey it is stated that more than six hundred fell out—that is more than thirty per cent. The peace element in the Cabinet is headed by Lord Salisbury, and supported by the Earl of Carnarvon and Lord John Manners. But the attention of the Government is distracted by the unfavourable view the House of Commons has taken of the appointment to the Controllership of the Stationery Office of Mr. Pigott, the Secretary to the late Promotion and Retirement Commission. *Apropos* thereto, it might be well to throw some further light upon the warrant framed on their proposals. Nothing is at present stirring in that direction, and I advise my readers not to be over expectant of its early appearance.

The death of Sir George Bell has given several officers a lift. The Colonelcy of the Royal Scots held by him will probably go to Sir Edmund Haythorne, who commanded the 1st Battalion during the latter part of the Crimean war. Lieut.-General John Hobson, Bombay Staff Corps, becomes a General; Sir Archibald Little a Lieut.-General; Sir Frederick Fitzwygram a Major-General; Major Tubervill, R. A., a Brevet Lieut.-Colonel, and Captain Buxton, 29th Foot, a Brevet Major.

At a moment when any hour may announce the further extension of the Eastern war, some statistics of the losses in the last one are not uninteresting. In all 341,000 men were levied, whereof but 30,000 were killed in battle. Thirty thousand died of wounds, and the remainder, 218,000, succumbed to disease in the district of the Crimea, added to some 60,000 who died after their departure from the seat of war. This brings the total loss to 410,000 men, of whom half were Russians, and the other half English, French, and Turks. The *Lancet*, in commenting upon these figures, says that "a well-found medical staff, although apparently a costly item, is in the long-run by far the most economical investment a nation undertaking a campaign can make."

The week has been extraordinarily wet, and the weather still shows little sign of improvement. But in spite of it the Engineer Volunteer Camp at Upnor has done good work. At Wimbledon yesterday the Volunteers beat the Army by 36 points. For the Service, there were only officers shooting, which, wet as they shot, was a pity, and much deplored by the Captain of the team, Captain Hoskyns, of the 77th. Newfoundland is a small place, and by all accounts a very unpleasant one to live in. It is impossible to get a house, and everything is very rough and primitive; but Sir John Glover seems to have found something to employ the time of an energetic Governor, and requires an additional Private Secretary who is to be supplied to him in the person of Lieutenant H. M. Jackson, of the Royal Artillery.

The police are just now attracting a considerable share of public attention. The proceedings against the three detectives for their conduct in the Paul fraud will not improbably lead to some change in the conducting of the force. At present there are eight thousand men under seven superior officers. The inspectors who rank as Captains, and receive the salute, &c., come from the ranks. Mr. Robson, who was I think in the Buffs, obtained leave some time ago to attach himself to a district, with a view probably of qualifying for some future appointment. Immediately the legion's ex-soldiers "looking for something to do," and who in the meantime do nothing caught the idea, and Mr. Cross and Colonel Henderson were so inundated with applications that they refused them one and all.

The Engineers are again to the fore. Major Marindin, the once popular Brigade Major at Chatham, has been appointed an Assistant Inspector of Railways. Many Woolwich cadets, although qualifying for the Sappers, elect to go into the Royal Artillery. It is a finer service say they. There is more soldiering. It is not so dull and monotonous. True, possibly. But from the worldly points of view those young gentlemen are wrong.

The announcement of Mr. Hardy last night in the House that the Retirement Warrant would provide in a measure for the utilisation of the services of retired officers in the Auxiliary Forces in time of need was satisfactory so far as it went. I myself cannot repel the conviction that these services ought to be utilised at all times, and not "in time of need" alone. But we shall see in due course what the warrant itself provides in the matter. If it go no further than the mere recommendation of the Royal Commission it is worth very little.

Everybody will be glad to hear of the recovery of Mr. Valentine Baker. He has gone north with Recuf Pasha, but too late to render the smallest assistance to the discomfited Turks. At this moment I hear that there are forty thousand Russians south of the Balkans. People talk a great deal about the dangers they run of flank attack. But there is little such fear in the case of an army possessing so little power of movement as the Ottoman. The state of affairs in Asia is more satisfactory. But Mukhtar Pasha will have to be careful that the Russian tactics are not *reculer pour mieux sauter*. There is more than a possibility that General Loris Melikoff hopes by his retreat to have the Turks out of their strongholds, to mass his own forces, then to fall upon the red fezes in overwhelming strength. Lord Derby said yesterday that by holding back we should be enabled to exercise far greater influence on the campaign than if we prematurely took part therein. A more pernicious doctrine could not be conceived, and certainly it is a new thing for an enemy to be allowed to possess himself of the entire country, and then to try to turn him out.

I forget whether I mentioned that Major Duncan, of the 102nd, had been appointed Professor of Hindustani at the Staff College If so, my apology is due for repeating it. But it is an important appointment thoroughly well bestowed. Although Colonel Hamley's time at the Staff College has been renewed, he will soon become Major-General, and then who will get the commandantship? There are already several candidates in the field, but none so well qualified or likely to make so good a commandant as the talented author of "The Operations of War."

FAMINE EXPENDITURE.

(Gazette of India, August 6.)

RESOLUTION.—The Governor General in Council deems it important that, in all accounts of expenditure on public works undertaken by the State for the relief of distress caused by famine, a clear distinction should be maintained between the cost of materials and skilled labour, and the outlay on unskilled labour.

2. It will often be impossible to avoid some expenditure on such works for materials (the purchase and carriage of which can seldom, if ever, contribute much to the relief of the distressed population, which is the first object of the works), or for skilled labour, the employment of which might not be required immediately for relief purposes; if it so required, the wages paid should, as a rule, be at unskilled rates only.

3. But it is the paramount duty of all authorities responsible for the expenditure on such works to reduce to a minimum the expenditure which is thus accessory to the large outlay for direct relief which, at such times, strains the resources of the State. The accounts should be so constructed as to show plainly the proportion of the whole expenditure absorbed in such accessories.

4. His Excellency in Council is accordingly pleased to decide, that whenever any public work is undertaken for purpose of famine relief, the expenditure thereon shall be classified as follows:—

(1.)—For materials.

(2.)—For labour paid at the rates fixed by the Government for unskilled labour upon relief works.

(3.)—For labour paid, for whatever reason, at any higher rates divided into (*a*) skilled labour, (*b*) supervision of labourers, skilled and unskilled.

5. Explanation will be expected by the Supreme Government whenever the proportion of the whole expenditure which falls under headings (1) and (3) bears any substantial proportion to the whole expenditure on the work

6. These instructions should, as far as possible, be applied retrospectively in the case of the works undertaken since the beginning of the existing famine in the Madras and Bombay Presidencies and in Mysore; and all future estimates of works to be thus undertaken should be classified in the manner thus prescribed.

BOMBAY.

THE Italian mail steamer Australia left Aden for Bombay on Thursday evening, the 9th instant.

A SALUTE of seventeen guns will be fired from the saluting battery this morning, on the occasion of the arrival at the Presidency from Poona of H. E. the Governor of Bombay. At H. E.'s desire the attendance of a guard of honour and heads of departments is dispensed with.

ASSAULT.—A Mahomedan, named Abdool Hoossin-Walee, was yesterday fined Rs. 30 by Mr. W. Webb, at the Fort Police Court, for assaulting Ismaljee Abdoola, by inflicting a severe blow on complainant's nose.

EVADING THE FARE PER MAIL STEAMER.—Yesterday at the Fort Police Court, a Mahomedan, named Noor-mahomed Shuffoodeen, was charged before Mr. W. Webb, at the instance of Mr. W. Craig, the purser of the P. and O. Co.'s steamship Rhine, with surreptitiously obtaining a passage by that vessel from Aden to this port without the consent of the captain or agents of that vessel. The prisoner, on admitting the offence, was convicted and fined Rs 35, in default to four weeks' rigorous imprisonment, of which amount, if recovered, Rs. 27 were ordered to be paid to complainant on behalf of the P. and O. Co., being the amount of passage money due by prisoner.

A GROUNDLESS CHARGE.—Two Hindoos, named Leela Khima and Devraj Dosee, appeared yesterday before Mr. W. Webb, at the Fort Police Court, to answer a charge preferred against them by Frajee Shamjee, a goldsmith, with aiding and abetting Moora Pooly in the commission of an offence of assault, and destroying, damaging, or defiling a place of worship or sacred object, with intent to insult the religion of any class of Hindoo community. Mr. Manekshaw Jehangier appeared for the prosecution, and Mr. Ghandibhoy for the defence. It appeared from the evidence that the charge was a got up one against defendants and that it was vexatious and groundless. Moreover it was proved by the defence that the prosecutor bore enmity against the accused parties inasmuch as they, a few months back, was charged by the defendants with enticing away a married woman, against whom a conviction was procured and sentenced to nine months' rigorous imprisonment. His Worship fined the prosecutor Rs. 20, which sum was awarded to the defendants as amends.

THE Bombay papers publish an advertisement of a company formed for the purpose of utilising the water power now running to waste in the river Taptee, and extending the spinning and weaving industry of Western India. It is strange that hitherto there should have been such absolute neglect throughout India of the great resources the country possesses in its large rivers, waterfalls, and, even in some of its tanks. And the field is still clear for the enterprising capitalist. The promoters of the company estimate the economy in the working of their mill will give them an advantage over those worked by steam, of more than ten per cent. per annum on their capital.—*Statesman.*

GRAM CLUB.—We are glad indeed to inform our readers that several sporting and other gentlemen in Poona have joined together to form a Gram Club with the view of importing into Poona from Jubbulpore and other railway stations, where gram can be purchased cheaply, sufficient gram to last them for several months. The banias in Poona have increased the price of gram to five seers per rupee. A circular has been sent round, a copy of which has already been largely signed, and it is hoped that the Gram Club will indeed be a success. —*Deccan Herald.*

PUBLIC MEETING IN BEHALF OF THE FAMINE DISTRICTS.—We are glad to say that a public meeting will be held next Wednesday for the purpose of collecting additional funds for the relief of the people distressed by famine. H. E. the Commander-in-Chief has kindly consented to preside on the occasion. We trust that the attendance at it will show how true and general is the interest felt by all classes in those who are suffering from famine. We hope that natives and Europeans will vie with each other in their liberality on this occasion.—*Id.*

THE FAMINE.—We are glad to find that Mr. Norman, our worthy Collector, is employing very thorough measures to meet the necessities of the wanderers from the distressed districts who are now in Poona. He has deputed a special mamletdar and three police inspectors to see that arrangements are made to meet the necessities of all classes and conditions of these poor and destitute villagers. Sheds have been erected for the shelter of about a thousand persons, and a large number is already accommodated there. The men are employed in breaking stones for metalling the roads and in other work which they may be able to perform. Orders have been given that persons suffering from cholera or other diseases should be located at Vishrambaddy, and that those who are seriously ill should be sent to the Civil Hospital. It is also ordered that persons who arrive in Poona in a wearied condition should be sheltered at the Dharmsala of Mr. Kesowjee Naik in the city. Those who are strong and able-bodied are to be sent to Nerul to work at the Bund which is in progress there. The police have received strict orders not to allow any one to wander about the city, but to remove them at once to the appointed places of shelter. It gives us unfeigned satisfaction to find such thorough measures being adopted by the authorities, assisted by other public bodies. Private charity has not been wanting; on the contrary, every one has been ready to help according to their means. But the help should be systematic, and as much as possible such as will encourage independence on the part of those who are aided. It is this feature that we admire in the arrangements made by Mr. Norman.—*Id.*

SOME little while ago Surgeon-Major Cornish, in a memorandum published by the Government of India, delivered his judgment on Surgeon Lyon's theory about diet. We had noticed Dr Lyon's paper at some length; but Dr. Cornish's reply seemed to us so illogical as to be uninteresting. No doubt he quoted Shakespeare and the Claimant with much readiness, and asserted emphatically that Dr. Lyon's arguments were fallacious; but his reply would hardly convince, let us say, the unscientific reader. Now Surgeon-Major Lyon has answered in his turn; doubtless his letter to General Kennedy will be duly published in the *Gazette of India*, and as a further and able exposition of his theory it deserves that publicity. Here we may suggest that Dr. Cornish, and the Government which followed his counsels, are under a delusion as to the use and meaning of averages. They have shown themselves unable to accept and act on the broad principles which have been so well applied in Bombay; and the result was exposed, though not for the first time, at the meeting held last Saturday in Madras.—*Pioneer.*

THE GOLD FIELDS.—Mr. Edwin Harris, late of the Alpha Gold Mines, has purchased an estate in Wynaad, not far from Goodalore, chiefly for the quartz reefs which exist on it. We hear, however, that the new gold mines will not be worked by any limited liability company Mr. Harris is an experienced miner, hailing from Cornwall first, and then Australia, and we have little doubt but that his labours will prove successful. The tug of speculation now seems to lie between coffee and gold. The former has been tried, and in most instances successfully; the latter is still in the fancy, and therefore no decided opinion should perhaps be passed upon the prospects it offers. It is, however, remarkable, that no gold mine in Wynaad has as yet declared a dividend, or even paid expenses. Exceptional instances of the rich yield of Wynaad quartz have been adduced; the general average of yield remains to be established. Prospectors are unquestionably sincere in their expectations; shareholders equally sanguine of results. The gold is there, in enormously paying quantities; and will enrich adventurers who come armed with capital first, and then wisdom to make use of science to separate the yellow ore from the rock in which it lies embedded. But as was once remarked to us about the eclipse of the moon by the earth, "There is the moon, you see, and the earth comes and shuts her up, but there is the moon still," so we trust that as long as gold exists in Wynaad, no misadventure will "shut the mines up."—*Neilgherry Courier.*

INDUS VALLEY RAILWAY.—The line between Kotree and Sehwan, a distance of 86 miles, is approaching completion. The bridge work is all finished, and the permanent way laid throughout except about two miles on the Buggatore Hills. The work on this portion is exceedingly heavy, some of the cuttings and banks being over 100 feet deep. Material trains run up to Lohi station occasionally, and the Executive Engineer, Mr. C. Graham, hopes to be able to run an engine right through to Sehwan early in September. If the weather been a little more temperate the work on the Ghauts would have been done long since. It is astonishing how the engineers have accomplished so much since March last, considering the heat that has prevailed there since the beginning of the hot season. In the day time the thermometer ranged between 110 deg. and 115 deg. in the Staff quarters on the Buggatore Hills, and at night rarely under 100 deg. Notwithstanding this terrific heat the Europeans have managed to exist, but judging from their golden features dissolution has now set in, and no wonder, for what constitution can stand even a mild simoom for six weeks in succession? The place is only fit for demons and felons, so it is hoped the "pioneers of Civilization" will avail themselves of the first through train to escape from such an infernal region.—*Beacon.*

WE regret to hear that Mr. Hart-Davies, C.S., is about leaving for Europe for the benefit of his health. During the period that this gentleman has officiated as Educational Inspector in Sind, he has laboured zealously and heartily for the social amelioration and moral elevation of the natives in the province, and he will be much missed when he leaves. Last year Mr. Hart-Davies acted as District Judge at Hydrabad, and won the respect and esteem of the bar there by the patience, impartiality, and ability he displayed in the disposal of cases, civil and criminal.—*Id.*

A CORRESPONDENT of the *Beacon* writes on the subject of the misdirected system of native education and its consequences:—"I have been sending my servant all over Karrachee for some days past to see if he could find a good carpenter, but without success. This, I consider, is a result of our educational policy. I am quite prepared, if called upon, to give practical illustrations of workmen's sons having obtained employment as clerks, while others after learning a few books of English in the Government or Mission schools refuse to join their parents in their mechanical callings. There are numbers of these discontents, who knock about the place in search of employment, who fancy that they are quite capable of tackling a Deputy Collectorship or some still higher office. If you advertise for a clerk at Rs. 15 or 20 you will find some 40 or 50 applicants from amongst the ranks of these cognoscenti. Now if one day questioned a goldsmith's son, who had failed in the matriculation examination, and was in search of employment as a clerk, why he did not join the goldsmith's shop, by which his father and brothers made such a profitable business. He replied, that he felt it *infra dig* to go and work as a mechanic, after receiving an English education. Now there are only a comparatively few educated boys at present, but what will it come to when every villager, cobbler, and sweeper will have learnt a smattering of English? we shall soon be without menial and domestic servants, artisans and mechanics. While the sons of respectable people, such as clerks and others, who they did their duty properly would follow the occupation of their forefathers, are dawdling about the town, the whole service is getting overcrowded by the children of the labouring classes. We think the Government ought in every important town in India to establish schools for teaching different kinds of mechanical industries. The country is rich in natural, mineral, and other resources, but is exceedingly poor for the want of the development of these resources. Schoolmasters should impress upon the boys they teach that they cannot all hope to obtain a clerkship or some such Government employment; but with the assistance of the sound education and training they receive in school, they ought to revive, improve, and develope the old handicraft of their forefathers and they would confer in this way a permanent benefit on their country, instead of wasting their time and their energies in the vain attempt to get employed by the Government as clerks, a position that is really greatly inferior to that of skilled artisans."

ADDITIONAL PASSENGERS BY THE HOMEWARD MAIL.

THE P. AND O. Co.'s s. s. NEPAUL, Captain R. Methven, sailed yesterday for Southampton, *vis* the Suez Canal, with the English Mails and the following additional passengers:—

For Southampton—Mr Thos Reid, Capt Gibbs, Monsr Ronelle, Dr. Selous, Mr J. Davies.
For Venice—Mr. Pickering.
For Suez—Mr. Hart-Davies, Mr. D. G. Soares.

FOOTBALL.

ENGLISH VS. SCOTCH AND IRISH.

THIS match was continued on Wednesday last, and as we predicted it turned out to be a most exciting contest. The sides were very even, and at any time during the game it was "a toss up" which would win A very fine run right behind the goal by W. Cooper gave the victory to the English. The match was well contested from start to finish and it was *par excellence* the game of the season.

For the victors—the Coopers, Carnell, Cartwright and Thatcher distinguished themselves; and for the defeated—Brown, Arthur, Macpherson, Murray and Hunter played well. The match will be again continued on Wednesday next when we have no doubt that our northern

from the Collectors' telegrams, and refer to the week ending 4th August. It will be seen that the net decrease in the number of people on Relief Works during the seven weeks subsequent to 9th June has amounted to 1,59,023.

10. Maps are not sent with this Summary.

11. A table is appended, showing the condition of the affected Native States.

12. With regard to the movements of food-grains, 1,631 tons were exported from Bombay to the Southern Mahratta Ports during the week ending 4 h August, and during the same period 6,727 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 4th August to the Southern Mahratta Ports and the Railway Stations in the distressed districts. It will be seen that the total amount delivered up to the 4 h August was 356,899 tons :—

*Food-grains sent to	In Oct., Nov., and Dec. 1876.	In Jan., Feb. & Mar. 1877.	In April 1877.	In May 1877.	In June 1877.	In July 1877.	In August (up to 4th)	Total.
	Tons	Tons	Tons	Tons	Tons	Tons	Tons	Tons

North-Eastern line, from Nasik to Bushawal.	12,829	7,471	2,346	1,211	2,014	1,524	304	27,709
Total ...	124239	95,511	36,601	42,472	26,853	12,865	8,358	356,899

13. There has been a favourable rainfall in the southern Collectorates; and elsewhere there have been showers which have fallen generally over the affected area, and have benefited the crops within their influence. The south-western monsoon still continues light, but has been sufficient for cultivation in the Konkan and western districts. The kharif crops, except here and there, have been preserved where sown, but are in much need of good rain. In Gujerat and Kattywar sufficient rain is still withheld, but there are some indications of a better fall. Anxiety is still felt as regards these parts of the Bombay Presidency, and in anticipation of a failure of the monsoon, precautionary measures are under consideration.

Prices of food-grain are slightly easier, and imports to rural districts continue to be sufficient. The stringency as regards prices is caused, not only by the circumstances of the season, and the crop prospects in the Bombay Presidency; which are not on the whole very unfavourable, but also by the heavy demand for food in the famine districts of Madras and Mysore, and of the Nizam's Dominions. This demand, as it at present exists, together with the probability of its increase, aggravate the difficulty in Bombay by causing the trade to maintain prices at a very high level in expectation of a better market. It seems now that much relief in this respect cannot be looked for until the prospects of the next crop are assured.

The imports of grain on the coast have been much greater, and have amounted to 1,631 tons during the week. The railway has also delivered more grain than last week at the different stations in the famine districts, namely, 6 727 against 6,319 tons. The delivery would have been far greater had a block not occurred on the Great Indian Peninsula Railway line, due to the want of engine power necessary to enable the Railway Company to deal with the through traffic from the northern Indian lines, as well as with their own traffic. Very large quantities of grain are now awaiting despatch at many of the railway stations.

It has not been found practicable to apply general pressure to the people to induce them to leave the relief works, but in five districts there has been a decrease in the number of people on works; in the other four there has been an increase, and this has been very marked in Koladgi, where the number has risen considerably; the net increase throughout the famine area amounts to 13,385. There has been a decrease of 3,924 receiving charitable relief, and a decrease of 6,920 in the number of young children.

The high prices that still prevail, and the protracted absence of general heavy rain, have retarded improvement in the general condition of the people.

Cholera is decreasing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

DARING ROBBERY AT THE MUNICIPAL OFFICE, MADRAS.

(*Madras Athenæum*, Aug. 8).

A ROBBERY of a most daring nature, though perhaps performed with a dexterity novel to Madras, was perpetrated at the Municipal Offices during Tuesday night. It appears that cheque had been drawn for Rs. 500, in favour of Mr. Stevenson, the Acting Executive Engineer. This latter gentleman, however, in order to prevent the forgery of his signature, invariably endorses these cheques in favour of Mr. Hayes. This he did on Tuesday last and the cheque was cashed. With this money it was intended to pay the various coolies employed under the Municipality; and for the sake of convenience it was drawn from the Bank, Rs. 400 in silver, and Rs. 100 in pice. The coolies should have been paid yesterday morning, but as the Bank would not have been opened in time, the money was drawn over night; and, on its arrival at the Municipal Office, it was put away in two substantial iron bound boxes fitted with patent locks—the silver in one, and the pice in the other. These boxes were again put away into a large almirah fitted also with a patent key, and, when the clerks left the office, was securely fastened from within. It may be here mentioned that the reason why it was not placed in the customary iron chest was, that the cash-keeper is unable to attend the office in consequence of illness, and that he refuses to permit any one to interfere with his cash until his return, or to give up the key.

The thieves would appear to have been well acquainted with the place in which the money was secured, and it is evident that their design must have been carefully considered, and their arrangements made days before the execution. Entering the office from the back staircase, the first thing that presented an impediment to their progress was a canvas partition separating the upper landing from a small office leading to the one in which the money was kept. This they cut away about two feet square, and through his they entered the first room. Here they were met by two large doors closed from the inside of the one adjoining it. Opening the venetians they must have put their hands through and unfastened the bolts; and having thus gained an entry, they appear to have met little resistence or difficulty in the completion of their object. The almirah was opened with a key, as was also the box containing the silver, which they emptied and then left upon the ground. The large box they carried into the yard where they first opened the lock, emptied the contents, carried away the pice, and threw the box in the corner; and as there is a large tree growing beside the wall, with its branches overhanging the road, it is believed that they must have made their escape by climbing up, getting over to the wall, and then jumping to the ground. The heavy bulk of silver and copper which they succeeded in carrying off would seem to indicate that several persons were concerned; and the fact that the thieves were in possession of keys which could open the boxes leads to the conclusion that some of the native employes were connected with the affair. It is a strange circumstance, however, that the the robbery was so successfully conducted, seeing that there were two watchmen and a fire-engine lascar sleeping in close proximity to the scene of the robbery.

The matter has been placed in the hands of the Police for investigation, and Mr. Inspector Fitzpatrick was engaged during the greater portion of yesterday in instituting enquiries. Up to last night no clue was obtained of the robbery.

RUSSIAN ACTIVITY IN THE BALTIC.

We hear from trustworthy sources that extraordinary activity is being displayed in increasing the Russian armaments along the Finnish and Baltic coasts. Men are working night and day at the Cronstadt torpedo factory preparing submarine torpdoes for the harbours, and last Sunday the steamer Ladoga conveyed 120 sailors to Wiborg, to be employed in preparing the channel there for the reception of them. Further detachments of sailors and workmen were to leave Cronstadt during the week to assist in the defensive preparation at Sveaborg, Hango, and other Finnish ports, to which places also large consignments of naval stores were to be forwarded. These preparations are due to the representations of General Todleben, who has reported the Finnish fortresses to be in a weak condition, and has been requested to personally superintend the works undertaken with a view to strengthening them. This sudden outburst of activity in the north is regarded at St. Petersburg as indicating the intention of the Russian Government to push matters to an extremity, and to be able to sustain a conflict with England in the Baltic should this policy lead to hostilities. The detention of the Mediterranean squadron at Cronstadt, when it has been under sailing orders the last three weeks, is considered to be confirmatory of this opinion.—*Globe*.

HOCKIN'S
IMPROVED PATENT SEIDLITZ POWDER
For immediately producing Seidlitz Water without the slightest trouble.

It differs from the Seidlitz Powders usually sold, in having all the ingredients in one bottle, is quite *tasteless*, and may be taken by *persons of all ages* as a *cooling beverage, mild aperient*, or *brisk purgative*, according to dose. In all cases of *Sickness, Headache*, &c., it is found to be invaluable, as also for *Bilious attacks*; and by its general purifying and cooling effect upon the Blood, may be considered as a great preventive of the majority of the ailments of life. For these reasons it is an indispensable necessary to every family, traveller, or emigrant.

Manufactured only by
HOCKIN, WILSON & Co.,
38, Duke Street, Manchester Square, London.

GRATEFUL—COMFORTING,
EPPS'S COCOA.
BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctor's bill. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well-fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

Sold in tin-lined packets and in soldered tins—soldered tins, ½lb. and 1 lb., are always to be preferred for export. Each packet or tin must be labelled thus :—

ADVERTISING AT RAILWAY STATIONS.
THE Proprietor of the "Bombay Gazette" Press having leased (among other privileges) from the Great Indian Peninsula Railway Company, and the Bombay Baroda and Central India Railway Company, the exclusive right of advertising at all the Railway Stations belonging to these two Companies, is prepared to contract with parties desirous of posting Notices or Advertisements on the lines.
The announcements may be in English or in any of the Native Languages.
The advantages which Railway Stations present as a means of bringing intimations of all kinds before the public have been demonstrated in England by the extensive use which is made by Advertisers, of every station, great and small, along every line in the United Kingdom.
Insurance Companies, Shipping Companies, Hotel-keepers, Merchants, Traders, and others who wish to force their business on the notice of the Public, all alike value the privilege of Railway Station Advertising.
There is no reason why the privilege should not be also specially valuable to Advertisers in India. Looking to the great and increasing number of Native Railway Passengers on the two trunk lines of Western India native merchants, traders, &c., seeing that they have the privilege of advertising in their own language, would find the publication of their announcement at Railway Stations a decided means of extending their business.
And as nearly ALL TRAVELLERS ARRIVING IN INDIA NOW LAND AT BOMBAY, and proceed by the G. I. P. or B. B. and C. I. Railways to their destinations, placard exhibited at the different Stations on those lines are every day becoming more and more valuable as means of bringing the Advertisers' business to the notice of the Public.
Advertisers can select the Stations, on either line, at which they wish their Placards posted, and may advertise for any period that may be agreed on. The charges have been fixed on an extremely moderate scale to encourage Advertisers to make a liberal use of the new means now offered of making announcements known to the Public.
Placards, according to the taste of Advertiser may be printed at the "Bombay Gazette" Press.

SCOTT & CO., M.R.C.V.S.,
